AGENCY RECEIVING REPORT COPY
The following equipment shall be delivered and installed and shall meet all specifications and conditions of the Purchasing Division's quotation No. 30218, closing date December 15, 1966.

Vendor shall furnish proof of public liability and property damage insurance as well as Statutory Bond in the full amount of the order. The latter form will be furnished by the Purchasing Division.

Carrels, student desks (free-standing)

**SPECIFICATIONS:**
The carrels shall be modular and modern in design. They shall consist of starter and adder units and shall be assembled as indicated on the drawing. They shall be so constructed that at a later date they may be rearranged in diversified assembled to meet changes in educational requirements.

**CONSTRUCTION:**
The units shall be 30" high x 36" wide. The upright columns shall be 2" x 2" of not less than #3 gauge steel providing knockouts to facilitate continuous concealed wiring (#6 and #8 wire), and equipped with 1-7/8" non-marking adjustable glides. The front legs shall be 1-1/3", #8 gauge square tubing equipped with a 1-3/8" adjustable glide.

The wing panels and backs shall be 34" high providing a distraction-free enclosure 24" high above the desk. These same panels shall extend 13" below the desk surface, thus affording a modesty and disturbance-free shield. The wings shall be no less than 3/4" thick and the backs no less than 5/8" thick.

The desk shall be 23" deep with 1-1/4" self-edged front and shall be free of knee space restricting aprons.

<td>All surfaces and edges shall consist of high pressure velvet furniture finish laminates which conform to MMA specifications with regard to abrasion, surface resistance to boiling water, cigarette burn test, color fastness test, flexible strength test, modulus of elasticity, deflection of rupture test and test of stain resistance. The laminates shall be bonded with a moisture proof glue to a 41 lb. density core stock, specifically engineered to provide a telegraph-free surface. Color shall be selected from manufacturer's standard patterns.</td>

</tbody>
</table>
|        |          |      | **ELECTRICAL FACILITIES:**  
A grounded electrical system shall be incorporated in the design of each carrel. Two convenience outlets shall be furnished in each unit. One shall be located just above the desk surface for the use of teaching devices. The second outlet shall be located near the top of the carrel to serve as a receptacle for the light. |            |        |
|        |          |      | The light shall consist of a specially designed fixture providing a 25 watt, 30" fluorescent tube with aluminum reflector shaped to furnish uniform distribution of light throughout the closure. The fixture shall be cushion mounted, 9" in from the back, for proper study light positioning. The bulb shall be completely enclosed within the housing for safety and protection purposes. A prismatic lens shall diffuse the light and provide a non-glare light source. The front of the fixture shall be surfaced with matching plastic laminate. |            |        |

**Double-faced units arranged as follows:**

5 double-faced units each group. Total of 90 carrels

4 double-faced units each group. Total of 24 carrels

4 double-faced units. Total of 8 carrels

6 double-faced units. Total of 12 carrels

1 double-unit each group
