News Briefs

CAMPUS

• This year's Madrigal Dinner has sold out. Memorial Union director Steve Wood said his office sold the last of 288 available tickets last Wednesday.

To place names on a waiting list for either night of the dinner, Friday or Saturday, those interested may call Wood at 628-5305.

• The FHSU School of Business and Office of University Relations, in cooperation with the Hays Chamber of Commerce, have compiled a Resource Directory of FHSU faculty, staff and administrative personnel with readily available expertise in dozens of areas.

For more information contact the School of Business at 628-5339.

• Actives and fall initiates of the Society for Collegiate Journalists should pay SCJ dues for the banquet by tomorrow. Contact Mary Karlin or Brett Akagi at 628-5373.

• The deadline for oral reports and master's theses and Specialist Field studies is Friday. They are due in the graduate office, Picken 211.

• Forsyth Library will have a dedication of the TOP CAT system in the library, Thursday at noon on the main floor of the library.

TOP CAT is the Tiger on-line public catalog and automated circulation system.

LOCAL

• Quilts by Barbara Gerritzen, an FHSU graduate, are currently on display in the gallery of the Hays Public Library. The quilts range from traditional patterns to optical illusions.

• The Hays Public Library's Feed and Film series continues today with "The Displaced Person."

The film is based on the short story by Flannery O'Connor about a World War II refugee family that came to live and work on a farm in Georgia.

After the film, discussion will be led by Richard Leeson, associate professor of English. The film is part of the American Short Story Film series, funded in part by a grant from the Kansas Committee for the Humanities, an affiliate of the National Endowment for the Humanities. The program begins at 12:05 p.m. in the library basement. Coffee is provided.

• "Christmas in the Holy Land" and "Christmas on Grandfather's Farm" will be featured films next week in the Hays Public Library's Feed and Film Series.

"Christmas in the Holy Land" visits the Holy Land at Christmas and introduces the viewer to various religious sites and celebrations.

"Christmas on Grandfather's Farm" depicts Christmas on an American farm in the late 1890s.

The program begins at 12:05 p.m. in the library basement. Coffee is provided.

ENGINEER - Darren Bean, son of Del and Kris Bean, Hays, tries out a wooden train set that operates on kid power at Toy Towne on the Mall yesterday afternoon. The potential Christmas present is one of the many toys and games on display at the store. (Photo by Carol Schryer)

Wiest Hall director resigns position

By Annette Augustine

Staff writer

The position of Wiest Hall director will soon be open. The job has been advertised, and the deadline for applications is today.

Jim Long, current Wiest Hall director, will soon be moving to New Haven, Conn.

Deborah Glenn-Long, his wife, received a job at Yale University as one of five assistant directors of undergraduate financial aid.

His last day will be Jan. 1, 1988, and he will then join his wife, who has already been in Connecticut for a little over a month.

The Wiest position is classified as a civil service position and a master's degree in counseling with an emphasis in student personnel is required.

"I have a master's degree now, but I got it while I was here," Long said.

"When I came to work here,

there were seven full-time residential directors, and none had a master's degree."

Long said he has not found a job yet, but that he looked around when he moved his wife to Connecticut.

He said there are a lot of colleges in the area and there are help wanted ads everywhere.

Although most of the jobs are student-type jobs, such as fast food service, they pay \$5 an hour.

Long said he would like to find a job with a college, either as a hall director or in student activities or student affairs, depending on what he is qualified for. The larger the school the more qualifications one needs.

Glenn-Long has a master's degree in counseling. She said that what helped her get the job at Yale was her financial aid experience and her thesis on efficiency in financial aid.

Glenn-Long worked at the Fort Hays State financial aid office, whose operation is

similar to that of Yale's in that everyone who works there needs to be familiar with all facets of financial aid.

Both Long and Glenn-Long said that, so far, they love Connecticut and that it is very pretty in the fall because of all the leaves changing color.

"And I really like the architecture. Some of the old buildings are just fantastic," Long said.

"When Yale was founded in 1716, it was on the north side of town, but the way the town has grown it is now located downtown.

The older part of campus has real elaborate buildings, some with copper roofs that have turned green."

Glenn-Long said she likes New Haven, Yale and the cultural aspects such as the ballet, plays and orchestra.

"There are a lot of opportunities we seldom had in Hays," she said.

"The ballet came only once a year to Hays, and we could never make it. Also, there is skiing and we can take skin diving classes."

Both say they have noticed some differences in the people in that they talk faster and are more blunt, and that the students are not interested in working.

Long said he believes this disinterest is because a lot of the students are wealthy and there is a lot of financial aid available.

"Yale is awesome so far as prestige. But you can't tell a Yale student from a Fort Hays student except that they (Yale students) are more knowledgeable moneywise," Glenn-Long said.

"Money is a more crucial matter with tuition \$20,000 a year.

"We have a lot more money to give the students and that makes my job nicer," she said.

Teacher certification program passes the test

By Barbara Youmans

Copy editor

The university's teacher education certification program at Fort Hays State underwent extensive evaluation Nov. 15-18 by a 19-member accreditation team from the Kansas Department of Education.

Although the state conducts regular reviews of the education department's program every five years, this visit included a more comprehensive study of the university's teacher certification program, which is evaluated every 10 years.

Thomas Pickering, dean of the School of Education, said, "Fort Hays State is fully accredited by the state board of education as a teacher education institution."

"When a student completes all the program requirements outlined by the university, he is issued a state teaching certificate for his area of study."

This year, the university's 47 programs that include teacher certification were evaluated to check compliance with state regulations.

Pickering said that in addition

to the requirements for classroom teachers, standards were also evaluated for school administration and counseling programs.

"The state's requirements for every program are in a manual," Pickering said.

"We must show that we're in compliance with those standards in order to maintain accreditation."

A self-study report on the university's teacher education program is contained in a 301-page manual developed by Pickering and the university's faculty.

The on-site team reviewed student transcripts, curriculum content and faculty qualifications.

Pickering said team members spent time visiting with program administrators, faculty members, principals and other "consumers that work with our graduates in Ellis, Victoria and Hays school districts."

The team also visited with student teachers currently in the field, sophomore and junior students and met with the

university's council on preparation of teachers.

"By talking with these various groups, the team can evaluate our teacher education program from a comprehensive overview," he said.

The evaluation team concluded its review Wednesday afternoon with an oral exit report citing areas where standards were not in com-

"I feel the evaluation went very well, and that we have a very good program that is conscientious in complying with the state's regulations."

- Thomas Pickering

pliance with the state's requirements.

"In about a month a written report will document the results of the evaluation," he said.

"We can then respond to their report by providing additional documentation stating either

how the deficiency will be corrected or by stating rebuttal to the citing."

In February, Pickering, Edward Hammond, university president; and James Murphy, vice president for academic affairs, will attend a meeting in Topeka of the Evaluation Review Committee, an advisory committee to the state board of education.

"They will have both the evaluation team's report and our response," he said.

"That committee will make a recommendation to the state board and the board will then act in April."

Pickering said the state will either grant the program continuation of accreditation, provisional continuation of accreditation or discontinue accreditation.

"I fully expect to receive continued accreditation," Pickering said.

"I feel the evaluation went very well, and that we have a very good program that is conscientious in complying with the state's regulations."

Tramel looks at admission policy issue

By David Burke

Senior copy editor

To most, the question of open admissions to Kansas universities may seem more of a political issue than a philosophical one.

However, Stephen Tramel, chairman of the philosophy department, will discuss the open admissions issue at a colloquium tomorrow night.

Tramel credited the idea for the colloquium to Paul Faber, associate professor of philosophy.

"He had suggested it, since it is very much in the news," Tramel said.

Faber said, "A question of open admissions is really a question of the purpose of a university -- and a question about the purpose of a university is in part a question about the purpose of a human life."

"That sort of issue is definitely a philosophical issue."

Tramel said the discussion will not be specifically linked to the Board of Regents' proposals.

"I'm going to look at it in general terms, rather than looking at policy specifically," Tramel said.

"From the standpoint of my talk, it's irrelevant whether to talk about the right of appropriateness."

"I'm not going to talk about details of what's in the Regents' program," Tramel said.

"Look at it in the context of whether it's just, whether anyone's rights are being damaged by it."

Tramel said he will also look at what items ought to be in a selective admissions policy.

"I'm going to talk about how you can't really settle that until you look at a university. What is a university?" Tramel said.

"And then I'm going to communicate my own theme -- pretty much what I think the answer is in the discussion."

The 90-minute colloquium, "Open Admissions and the Idea of a University," will be at 7:30 p.m. tomorrow in the Memorial Union State Room. The talk is free and open to the public.

The colloquia are sponsored monthly by the philosophy department. Topics scheduled for next semester include economic justice, computers and the understanding of language, and philosophy of the mind.

Bomb threat disrupts sleep at McMIndes

Residents of McMIndes Hall were evacuated from the building early yesterday morning because of a bomb threat.

The threat was phoned into a resident's room. The resident then reported it to security, Mike Ediger, McMIndes Hall director, said.

"A standardized procedure was followed after receiving the threat," Ediger said.

Campus security officers checked the building and then phoned for permission to allow residents back into the hall. Bill Jellison, vice president for student affairs, said.

"We have, on occasion, caught the person who called in a threat. And we do not hesitate to press charges and to remove the person from school," Jellison said.

Editorial

Mentally disturbed homeless not to be deprived of rights

You have the right to be crazy.
You have the right to be homeless.
But if you want to be crazy and homeless, you might have to fight for your right.

New York City Mayor Edward Koch ordered social workers to begin rounding up the homeless mentally ill last month.

The first person to be picked up was Joyce Brown, a 40-year-old former stenographer, who has lived for the past year on a sidewalk.

She was forcibly committed to Bellevue Hospital where she was diagnosed as suffering from paranoid schizophrenia.

Brown, represented by the New York Civil Liberties Union, protested against her "incarceration."

Last week, she won the first round in what could well become a landmark court battle over the rights of the homeless, who quite often suffer from psychiatric disorders.

The scenario that Koch tries to implement in New York reality bears more resemblance to a totalitarian than a free, democratic state.

Maybe the life of the homeless does not agree with the current standard of aesthetics, but that should not make them victims of police force.

And Brown is but one example that the disturbed homeless are not necessarily that disturbed, and that they more often than not prefer their status quo.

Judge Robert Lippman found her to be "educated, intelligent," and said she "displayed a sense of humor, pride and a fierce independence of spirit." Quoting the Roman poet Juvenal, Lippman said, "Bitter poverty has no harder pang than that it makes men ridiculous."

He said in his decision that "freedom, constitutionally guaranteed, is the right of all, no less of those who are mentally ill ... beggars can be choosers."

Freedom is freedom. Orders, such as Koch's, are at conflict with what this country and its constitution are all about. In a country like this, nobody should be exempt from this freedom, unless he or she poses a threat to society.

The city is contesting Lippman's ruling and until an appeals court takes up the matter next week, Brown remains at Bellevue.

Ironically, whatever the decision will be, hospitalization of the homeless will just lead to increase another problem -- New York already has a shortage of hospital beds for the mentally ill.

Letters

Vocabulary conceals message

Dear Editor,

While I am dazzled with Mr. Squire R. Boone's mastery of vocabulary, I am not impressed with his ability to clearly communicate his ideas in writing. Please include a "plain language" translation along side future letters of this type.

Thanksgiving vacation spoiled by cold symptoms

Vacations. I usually love to have vacations.

They are fun, relaxing and you don't have to do any, or even think about, homework.

That was what I originally planned to do during the Thanksgiving vacation last week.

I looked forward to going home and just becoming a lazy, sloppy, total bum.

I thought I'd sleep all day and spend the nights with old friends.

I organized my time so I could spend part of my vacation with family and the rest partying until dawn.

Isn't that just what vacations were designed for?

Well, my week ended up being totally different from what I had originally planned.

And it was far from a great vacation.

I caught a cold. I know that these things happen, but they only seem to happen to me.

It was a week that was spent popping aspirin and vitamins. Instead of partying all night, I ended up staying awake all night trying to give sacrifice to the porcelain god.

I had a fever and chills. And through it all, I had a headache that wouldn't quit.

Now in my family, it was not

me who always got sick and spent half of the school year at home because of one type of cold or another. It was my sister.

Until just a few years ago, I very rarely got sick.

But today, that is all different and my vacation only proved it.

Because of my illness, I was reluctant to venture out into the cold.

My mother was also not to happy with the idea of me going out, so she tried to help cure my illness.

She bought me vitamins and aspirin and forced them down my throat.

And every night I got the full dosage of what has to be the absolute worst tasting medicine available -- Nyquil.

Not being able to stand another night of watching old movies, I went out with some friends.

We went to the show.

It was good, but I coughed during the entire thing and ended up being too tired to spend the rest of the night with my friends.

Next time, during Christmas vacation, I plan to do my best to stay healthy and take my vitamins every day to stay that way.

But knowing my luck since school started, I'll end up with pneumonia or a broken leg.

ted harbin

Drinking and driving fatal combination for all

Why do people feel that they have to get into a car and drive while they are drunk? I'll never understand it.

I do an equally ignorant stunt -- I get drunk and let another drunk drive me. That's really bright. I think that just because I'm not at the wheel that I don't have to worry.

On the night of Oktoberfest, some friends of mine were in town and we had been out partying.

Preston had his car, so he drove us home. We got to the house, and as all of us drunks piled out of the car, Preston fell down.

He was so drunk that he couldn't even walk. Now, we had our lives in his hands. Scary thought, huh?

Two weeks ago, some friends back home went to a dance in another town. When it was time to go home, four of them hopped into a pick-up truck and headed back.

On the way, the three drunk passengers were snuggled together asleep. Darren, the also-drunk driver, fell asleep as well.

When the truck stopped rolling, Darren and two of the passengers got out unhurt.

Robby, the third passenger, who was sitting in the middle, was rushed to Wichita by helicopter. The doctors feared serious neck injuries.

Robby will have to wear a "Halo" for at least three months. The "Halo" is a device

that is designated to keep the neck immobile by a harness around the chest and stomach and bars that connect to a head piece.

So that the head piece won't slide away from the victim's head, four bolts are screwed into the skull. This causes the victim immense pain, as the bolts will need to be tightened through the duration of the stability.

No matter what, Robby's neck will always cause him problems. During his surgery, they took pieces of bone from his ribs and fused them into his neck. He will never be able to move his neck the way he should.

I don't know about you, but I don't think that getting drunk is worth all that. My life is more important than a good buzz.

Another bad thing about driving drunk is that there's the chance of getting a DUI. A relative of mine that lives in another state was picked up on his way home. It was about 2 a.m. Sunday.

He was taken to jail and had to spend one night there. His wife had to pay a cash bail of \$500, and she couldn't get it until the following evening.

The police impounded his vehicle and he had to pay \$25 to get it out. He lost his driver's license for 90 days and will have to pay \$100 to get it back.

He will also have to go to Alcoholics

Anonymous.

After legal fees and court costs, along with the fines, he will end up losing about \$1,500. All of that because he couldn't control his alcohol intake enough to drive home safely.

This man has four children to take care of. Just think if he had been killed. What would that family do without their main income?

His insurance company shouldn't pay anything; he was the one endangering the lives of others.

Let me ask you this: How important is your life? Do you need alcohol bad enough to endanger your life as well as the lives of others?

Don't get me wrong -- I love to party just as much or more than the next guy. I just believe that we should play it smart when we go out to have fun. I'd rather walk home than lose control of a vehicle and kill someone.

A bad thing around Hays is the fact that there is no alcohol allowed on campus. All of those students that live in residence halls have to go off of campus to drink. Most of them don't like to get out in the cold, so they drive around to get their alcohol.

There is nothing in this world that is worth killing yourself over. Alcohol is not a necessity, like some people think; it is a luxury.

Drinking can be fun, but death isn't. Think about it.

kathy kirkman

K-State AIDS controversy to set precedent

Sunday, a story in the Wichita Eagle Beacon reported that a former Kansas State University faculty member is threatening the school with a lawsuit for not allowing him to return to his job because he has AIDS.

Maybe this doesn't sound too unusual to some, but the problem is K-State is more or less breaking one of their own rules.

And with good reason, too.

You see, K-State was the first of the Regents schools to implement a policy abiding by anti-discrimination laws and make "reasonable" decisions on a case-by-case basis.

Dennis Howard is the victim, traumatized by both the disease and the treatment.

Howard says that as soon as his colleagues found out about his illness, they began treating him differently -- avoiding him.

What Howard is seeking from this lawsuit is not much compared to the damage he claims to have suffered. He wants a public apology, the chance to go back to work and a

reinstatement of the sick leave he has used to maintain his salary for the past six months.

The situation presented here is not the norm in the state of Kansas yet. Unfortunately, the outcome of Howard's struggle could set a precedent for any future AIDS discrimination cases.

If Howard proceeds with the lawsuit and loses, it could open the door for all businesses employing victims of AIDS to start firing them left and right.

But worse yet, if Howard wins, his case could encourage many AIDS victims to return to their jobs, and perform below the level of requirement.

Realistically, one should not judge this situation solely, or even remotely, upon the fact that Howard is a victim of AIDS. The situation should be judged only as to whether or not Howard can perform his job as well as or better than he did before.

It is unfortunate that Howard has been treated so badly by his colleagues, and that

alone calls for a sort of retraction. It's too bad that his colleagues don't know enough about the disease to know that it cannot be contracted by casual contact, which is the usual working conditions of a university atmosphere.

That's really not the problem, though. The big question is whether or not Howard can perform at his job like he did before becoming ill.

Some may say that Howard deserves the right to prove himself. Maybe so, but the line has to be drawn somewhere. Obviously he could not do the job if he was asked to take a medical leave of absence.

It may be tough to prove, but in the long run, Howard is not being punished by K-State for having AIDS. If he was doing his job below the set standards and he did not have AIDS, he would be let go. Why make the exception for a man dying of AIDS? It just can't be done, because if it happens once, it is only bound to happen again.

the university Leader

The University Leader, the official Fort Hays State student newspaper, is published Tuesdays and Fridays, except during university holidays, examination periods, or on specially announced occasions. Unsigned editorials are the views of the editor in chief and not necessarily the views of the staff. Offices are located in Picken 104, Hays, KS 67601-4099. The telephone number is (913) 628-5301. Student subscriptions are paid from activity fees; mail subscription rates are \$25 per year. Third class postage is paid at Hays. Publication identification number is 51990.

- Press conference at 4:30 p.m. in the Memorial Union Pioneer Room.
- Madrigal Dinner reception at 6:15 p.m. in the Memorial Union Sunset Lounge.

COMING EVENTS

- Concert Choir Cathedral concert at 8 p.m. Tuesday Dec. 8 at the St. Fidelis Church, Victoria.
- Library luncheon at noon, Tuesday Dec. 8 in the Memorial Union Fort Hays Ballroom.
- University Affairs committee and faculty senate at 3:30 p.m. Wednesday, Dec. 9, in the Memorial Union State Room.

Natural gas, oil search made easier

By Madeline Holler

Staff writer

The search for oil and natural gas may now be as simple as adjusting the focus lens on a camera.

Photogeologist and geomorphologist Stephanie B. Urban will visit the Fort Hays State campus as a part of the visiting petroleum geologists guest lecture series.

Urban will be discussing ways to find oil and natural gas using air photos and application of remote sensing as methods of oil and gas exploration.

Kenneth Neuhauser, associate professor of geology, described the process of finding oil or natural gas through the use of photographs.

"Photographs are taken from high altitudes and then studied for signs of fractures, faults and different fracture patterns,"

Neuhauser said.

"In the case of Urban, she'll be using black and white photos taken with expensive equipment that produces very high quality photos," he said.

Urban will also briefly introduce remote sensing, a method of photography from airplanes and satellites.

"Urban will be touching upon remote sensing, but her main emphasis is going to be how she and her company apply photography techniques to find oil in the Mid-Continent area," he said.

Neuhauser said that techniques such as remote sensing and photogeology are necessary as they are a cheaper than other methods such as seismic surveying.

"It's important that we get people like this to speak and educate about cheaper methods of finding oil and natural gas

until those prices go up," he said.

Urban will also explain the process through which her company goes to produce such material for narrowing down the possible locations of oil.

Neuhauser said that he expects many of the geology majors and graduate students to come to the lecture and find out about job opportunities.

He said he hopes to see other sectors of the community there, too.

"Hopefully we will see a few people from the community who deal with oil," he said.

"I also expect a few from Wichita and the Great Bend area."

The lecture will begin at 7 p.m. in Albertson 108 and last about 50 minutes.

Neuhauser said that Urban may be available, during the afternoon to meet the students.

Representatives display computer hardware today

Representatives from four major computer companies will be on campus today displaying their hardware.

Computerland, the local brand dealer for IBM, Zenith and Apple computers, will have a representative at the Memorial Union Sunset Lounge this afternoon from 2 to 4 p.m. to demonstrate the machinery.

Radio Shack, the fourth computer brand at this computer fair, has also been asked to attend, according to Keith Faulkner, director of the computing center.

"We have an agreement signed now with the four companies to acquire computer hardware at a substantial discount for faculty, staff and students," Faulkner said.

"IBM, for instance, offers a 40 percent discount across the line and Zenith runs anywhere from 35 to 40 percent."

The computer fair is open to all faculty, staff and students who have an interest in the new computer hardware.

"They can see what hardware is available, see the prices and even order a computer right there. There will be order blanks available," Faulkner said.

"I think there will be a lot of interest shown by the students. We're getting more and more faculty and students interested."

"Plus, they'll get the opportunity to ask any questions they might have for the representatives."

Fear, stress, anxiety

Survival of finals week possible through special study techniques

By Kristy Love

Copy editor

The end of the semester is approaching, and with it comes much pressure to do well on final exams.

After studying for hours, students may be susceptible to extreme stress.

However, by using proper study processes and relaxation techniques, students can maintain their sanity through finals and into the holiday vacation.

Gerald Calais, assistant professor of education, instructs a course on study skills.

He makes several suggestions for students as they begin to prepare for finals.

Students should begin their studying by organizing lecture notes and making sure they are understandable, Calais said.

"They need to understand the concept, instead of just having 10,000 bits of information," Calais said.

Using outlining techniques, such as sub-categorizing parts of the notes or just added letters and Roman numerals before blocks of information, can help make notes more understandable.

Marking key words in the margins makes reviewing notes and text easier, also.

Calais suggests turning the key words into a question and answering those questions during study times.

"In addition, if one is reading a book, important notes should be underlined," Calais said.

Notes from textbooks should be rearranged to correspond with the organization of the lecture notes.

Calais also suggests graphing information for easy reading. This graphic representation is especially effective when studying theories.

Knowing what type of questions will be asked can help a student prepare for the test, also, according to Calais.

Although most people believe that multiple choice questions are easier than other types, they can be tricky because they are

more technical, Calais said. Besides being able to relate the question with an answer, being able to differentiate similar answers is often required.

Short answer questions require little comprehension, Calais said.

Preparing for an essay test can mean simply guessing what questions the professor will think are important.

"By generating questions, the student generates expectations, and that provides a reason to read," Calais said.

Definitions can be learned by studying note cards, which Calais refers to as "concept cards."

Labeling tests are best studied for by doing just that -- by practicing labeling given materials.

Calais said that just re-reading the materials has no study benefits.

"Re-reading is absurd, and of little if any purpose. What is needed is a critical, in-depth review," he said.

"It's important to recognize that one can only do so much in a given period."

- Richard Schellenberg

Efficiently planning a study process will prevent frustration and panic, Calais said.

However, if a student does become over-stressed because of finals and holiday planning, relaxation is not that difficult.

Three stress-fighting processes, suggested by Richard Schellenberg, associate professor of psychology, can make all the difference in remaining calm.

Schellenberg is the instructor of a stress management course.

During stressful times, students can take what Schellenberg calls a mini-break.

"One should sit down somewhere comfortable, slowly take a deep breath, hold it, then exhale very slowly."

"At the same time one should let the shoulders droop, smile

and say something relaxing, like 'I am calm,'" Schellenberg said.

Schellenberg said mini-breaks are useful because they can be used throughout the day to help relieve stressful situations.

The second thing that Schellenberg suggests for students is effective time management.

"I think the best thing they can do as far as helping to manage stress-at the end of the semester is to make out a realistic schedule of things to do ahead of time," Schellenberg said.

"It's important to recognize that one can only do so much in a given period."

"The whole idea of making out the plan ahead of time is to pace, not race, one's self. The schedule allows you to do that," he said.

The third stress-fighter Schellenberg suggested was to keep habits in check.

"Students should be sure to eat balanced meals and keep down alcohol use so they can be alert both physically and mentally."

There are two main signs of stress, physical and psychological.

Psychological signs include anxiety and tension.

Physical signs could be headaches and digestive trouble.

However, those physical signs can also be real physical problems that need to be checked with a doctor, Schellenberg said.

"Don't assume that they are stress related," he said.

Some students can become overwhelmed by stress, but they should not "suffer in silence," Schellenberg said.

The George A. Kelly Psychological Service Center at Fort Hays State offers students help with problems including stress and does not charge for its services.

Other sources of help students can contact if they feel extreme pressure are the High Plains Mental Health Center, 208 East Seventh, and a variety of private psychologists.

Study skills class to help students to learn how to handle stress

The plan is called PLAE, named for the steps of the study process.

It is being implemented this spring in the study skills class taught by Gerald Calais, assistant professor of education.

PLAE originated at the University of Georgia in Athens, Calais said.

According to PLAE, a student

should begin to study for a test by preparing the study materials, such as lecture notes or textbooks.

Next, the student should list the expectations the professor has set for the class. A one-on-one conference might be required in order to know exactly what the professor has in mind for the class, Calais said.

The third step is to activate a strategy model.

The final step is evaluation, where the student determines which parts of the process are effective.

Calais said that besides PLAE, the class also covers outlining, brainstorming, lecture notes and identifying major thought patterns and signal words.

Second home economics trip to New York planned

By Jennifer Oborny

Staff writer

While most Fort Hays State students will be enjoying Christmas vacation, 10 home economics students and faculty will be on their way to New York City.

This is the second annual trip to New York City planned by the home economics department.

A group of students went last year and, due to popular demand, the trip was again scheduled for this year.

"Many other schools were taking their home economics students, so I thought it would be educational for ours," Merlene Lyman, chairman of the department of home economics, said.

Encore campaign wins first place nationwide

By Kathy Kirkman

Managing editor

Two Fort Hays State students won first place honors at the National Association of Campus Activities Regional Graphics Competition.

Eileen Sander and Amy Wing, Hays seniors, submitted their work for the 1986 Encore series publicity campaign.

The design was used on posters, folders, programs and newspaper advertisements as part of the publicity campaign for the Encore series.

I.B. Dent, director of student

activities, said he was happy about the results.

"I was very pleased that we took two first places," he said.

Sanders and Wing were students in the Design III class taught by Chaiwat Thumsuajant, instructor of art.

Originally, Wing said, the design was made for a project assigned in class.

"I'm really surprised that we won, especially since it didn't turn out the way we wanted it to," Wing said.

"We were really proud of the original."

Wing, a graphic design major, said this award is a boost for

her future.

"Any printed piece is good for your portfolio," she said.

The competition took place last weekend in Kansas City. Dent said the region that FHSU participates in is shared with schools in Kansas, Missouri, Colorado and Nebraska.

"We submitted different posters over the last year," Dent said.

He said FHSU won one of the first places in excellence in the area of graphic arts for the promotion of campus activities and events.

Both awards were in the student division.

Christmas tree to be lit tonight

Christmas is coming to Fort Hays State.

The Christmas tree will be lit tonight.

At 6:30 p.m. the ceremonies will start in front of Picken Hall. Bob Lowen, director of University Relations, will be the master of ceremonies and greet people as they come to watch.

The FHSU Concert Choir will lead everyone in singing carols.

"The choir will lead and everyone can join in," Melinda Keim, co-sponsor of the Student Alumni Association.

University President Edward Hammond will make a short speech and then turn on the switch to light the tree.

More caroling will follow, and there will be a special visitor.

"We will have a Santa Claus come and hand out candy canes to the kids," Keim said.

An informal reception will

follow in the Sunset Lounge in the Union.

"At the reception we will have refreshments like hot chocolate to drink," Keim said.

The Christmas tree lighting is sponsored by the Student Alumni Association, Memorial Union Activities Board and the Alumni Association.

Business Briefs

The following companies will be interviewing on campus. Sign up sheets are in the Placement Office, Picken 103.

✓ Small and Banning, Chartered will be on campus Tuesday, Dec. 8 to interview accounting students for an accountant position.

✓ Burger King will be interviewing Monday, Dec. 7, to interview business and liberal art majors for a manager trainee position.

✓ Baird, Kurtz and Dobson will interview accounting students for accountant position Tuesday Dec. 8.

Explosive Haymakers look to KO Tiger team

By Mike Marzoff

Sports editor

High-scoring basketball games often make for excitement for the fans.

If so, then the men's contest tomorrow night between Fort Hays State and Phillips University should be extra-exciting.

The Tigers will carry a 3-0 record into the contest, while the Haymakers tote a 5-0 mark.

In the three contests the Tigers played in, they have broken the 100-point plateau twice, averaging 103 points a contest.

Meanwhile, Phillips is averaging over 90 points a contest for the year.

"They run and set a fast pace, and of course we like to do that," Head Coach Bill Morse said.

"So, it will probably make for a high scoring game like the Kearney game (FHSU's 108-83 win over Kearney State College last Monday)."

The Tigers will again floor the same starting five as in the three previous contests.

First-year Tiger, Ronnie Thompson, a 6-8 junior, will start at one forward.

Thompson is leading the Tigers in scoring and rebounding this season. He will carry a 20 point average and 12.3 rebound average into the game.

Thompson also leads the team with a 3.3 blocked shot average.

Cedric Williams will begin at the other forward position. Williams also has a double figure average, one of five on the team.

Williams, 6-6, is scoring 13.3 a game, good for third on the team. With a 2.3 average in steals, he leads the Tigers in that category.

The center spot will be filled by Thomas Hardnett.

The 6-9 Hardnett is averaging 11.3 points a game. He is third on the team in rebounding at 6.3.

At point guard, Shaun Manning, another first year player for the Tigers, is expected to start.

Manning is the only starter not averaging in double figures, at 6.3 points a game.

His six assists are second on the team, and Manning is shooting 50 percent from three-point range.

Starting at the other guard spot is Mark Harris.

Harris, MVP of the recent Pepsi Tip-Off tournament, is second on the club in scoring.

Harris brings a 16-point average into the game, and leads the Tigers in several categories.

Harris is averaging 4.3 assists a game to lead FHSU. His .621 shooting percentage on 18-29 shooting from the floor, including 14-20 from 2-point

range, also leads the Tigers.

Brett Buller also is averaging double figures for the Tigers at 10.3 points a game. Buller is second on the team in rebounding, with a 7.7 average.

Also off the bench for FHSU will be Antoine Williamson and Mike Miller.

Williamson will help out at the point guard's spot, with an 8.7 scoring average.

Miller is still recovering from an injury and is averaging six points a contest.

"Mike is coming along better," Morse said. "But this team would be very quick at the position that Mike is playing and that will be to his disadvantage."

"Until he gets his quickness back, it is going to be hard for him to contribute a lot. He will help us an awful lot on offense, but defensively it will be hard for him for a while."

Phillips, meanwhile, will not boast near the height of the Tigers, with its tallest player being 6-4.

"Our height advantage will be to our advantage, provided they don't out-quick us," Morse said.

"So far, we have been the bigger team and just as quick as everybody else."

"Phillips is very, very quick at four positions, and if we don't get out-quickened, our size will help us a lot."

The Haymakers will start an

all junior and senior lineup led by Timothy Carr and Matthew Price.

"Price and Carr are the main players, but I watched a tape of them and they looked like they had pretty good balance," Morse said.

"I think they are the better players, but they looked good all the way around and have a good overall attack. We will just have to go out and play everybody tough."

Price, a 6-3 senior guard, leads the Haymakers in scoring at 23 points a game.

Carr, at 6-4, is the center for Phillips, leading the team in rebounds with 12 a contest and owns a 21-point scoring average.

All five starters, however, will bring double-digit averages into Gross Memorial Coliseum.

Point guard Curtis Foster, 5-7, averages 10 points a game and leads the Haymakers with 4.3 assists an outing.

Samuel Jackson and Mark Clanton will open the contest at the forward position.

Jackson, at 6-2, averages 16 points a game and Clanton, at 6-4, averages 11 points for Phillips.

When the Tigers take the floor at 7:30 p.m., they will put a 13-game home winning streak on the line. They have won 47 of their last 48 game in GMC.

Gymnastics team opens season in Colorado meet

By Ted Harbin

Staff writer

On Saturday, the Fort Hays State gymnastics team will begin its season and will continue until late February.

Head Coach Tawnita Augustine said that 12 girls are out for this year's squad, and eight of those are returning from last year's team.

Augustine said that her team will try to improve on last year, a year in which the Tigers placed fourth in the NAIA national meet.

"We do have the opportunity, if we qualify, to go to the NCAA Division-II nationals, in addition to the NAIA nationals," she said.

Half of the members on the squad are sophomores, and only one junior and one senior will compete.

In gymnastics, the two levels in which the Tigers will compete

are the all-around and the specialists. There will be 10 athletes competing in the all-around.

Both upperclassmen, Yvonne Hinojosa and Rena Lucke, will be competing in the all-around.

Hinojosa is a senior from San Antonio, Texas.

Lucke, Pasadena, Md., junior, was an NAIA All-American last year, and placed fourth on the vault and third on the uneven bars in the national meet.

Julie Purtil, Greeley, Colo., sophomore, and Jacque Douglas, Clinton, Iowa, freshman, are the two who will be competing in the specialist category. They will both be working on the balance beam, vault and floor exercise.

Tammie Mowery and Connie Terrell, Garland, Texas, sophomores, will be competing in the all-around.

Stacy Flannigan, Crystal Lake, Ill., and Cary Hertel,

Wichita, are the other two sophomores who will be in the all-around.

Hertel was a national finalist last season on the vault and balance beam and an All-American on the balance beam.

She also received fourth place in the national meet for her performance on the beam.

Flannigan was a vault finalist

"We have a lot of potential. If we develop it, I expect to do very well."

—Tawnita Augustine

in the national meet last year as well.

Four freshmen will be joining the team this year. All of them will be competing in the all-around.

"We've maintained all of our strengths from nationals last year, plus brought in four freshman recruits that I think will really make the team better," Augustine said.

Augustine said that the best events of Angie Ables, Topeka freshman, are the uneven bars and the balance beam.

She said that Wendy Boudreau, Aston, Penn., freshman, excels in the vault and the uneven bars, as does Alicia Young, Longmont, Colo., freshman.

Augustine said the floor exercise and the vault were Carolanne Leslie's best events. Leslie is a Dix Hills, N.Y., freshman.

In the all-around competition the athletes compete in four events, balance beam, vault, uneven bars and floor exercise.

"We compete against Division-II and -I schools. There are not a lot of NAIA schools (in this area), the only one being Adams State College in Colorado," Augustine said.

According to Augustine, FHSU will compete against Adams State four times this year.

Saturday, the Tigers will travel to Colorado Springs, Colo., for the Rocky Mountain Open.

The first home meet will be on Jan. 29, with the University of Northern Colorado and Texas Women's University coming to Hays.

"I think that our team is better than it was last year."

"We have a lot of potential. If we develop it, I expect to do very well," Augustine said.

Lady Tigers look to sweep next 5 games

By Eric Hodson

Assistant sports editor

The Fort Hays State Lady Tigers have set a tough goal for themselves before the Christmas break.

Tough, considering that the team is being hampered by injuries and illness.

Their goal is to win all five games scheduled before the break begins. Four of the games are on their home court.

The first of their five games will be against Phillips University of Enid, Okla.

FHSU will be without the services of guard Dianne Dugan and center Annette Wiles.

Dugan sustained a knee injury in the game against St. Mary of the Plains College and could be out for two weeks. Head Coach John Klein said.

Wiles is suffering from an illness, Klein said, and center Chris Biser will start, but will play with a shoulder injury.

Offensively, Wiles could be missed as she averaged 11.5 points and four rebounds per contest in the first two games for FHSU.

Even with her injury, Biser is

averaging over 10 points and five rebounds per game.

Klein said that Biser will probably have to play more minutes during the Phillips contest with Wiles out.

Senior forward Penny Fischer leads the Lady Tigers in scoring from last year. Fischer is averaging 14.5 points and eight rebounds per contest.

"It's frustrating, but we have to roll with the punches and do the best we can. We have to take advantage of these next five games because four of them are at home," Klein said.

Rhonda Cramer is expected to start in place of Dugan and Shannen Anderson could see more playing time substituting for Biser, Klein said.

Probable starters for the Phillips squad are Sherri Nault, 6-4 center; Kaprice Richardson, 5-7 guard; Debra Edwards, 5-8 forward and Dana Ewing, 5-9 forward.

"We expect them to be aggressive, quick and ready to play. They have played some tough competition in Oklahoma and have also played quite a few more games than us," Klein said.

This season, the Fillies have defeated Oklahoma Panhandle State University, Benedictine College and Mid-America Nazarene College. Their two losses came to Emporia State University and East Central Oklahoma State University.

Klein said Phillips has a lot of new players and a new coach this year.

The Lady Tigers will play the Fillies at 5:30 p.m. Wednesday in the coliseum.

"We have to go hard each night. I hope we can get everybody healthy as we go on," Klein said.

ALL TIED UP -- Gaven Ludlow, Russell sophomore, tries to escape from his opponent's hold in yesterday's Fort Hays Open this weekend. (Photo by Jean Walker)

Ludlow making transition from football to wrestling

By Heather Anderson

Staff writer

For an athlete, a great honor lies in having the opportunity to participate in a sport on the collegiate level.

However, the opportunity to play two sports is even a greater honor.

Such is the case for Gaven Ludlow, Russell sophomore.

Ludlow just finished the fall season as a Fort Hays State football player, and is now performing as an FHSU wrestler.

Although he enjoys both sports, the time devoted to practice and playing requires self-discipline and smart use of time.

"It takes a little more work to keep up in school when out for sports," Ludlow said.

"You have practice in the morning, classes all day, and practice again until 6:30 or 7 at night."

"The only time you have to study is at night, and even though you're tired, you have to stay awake, even though you know you have to go to practice again early in the morning."

"Last year, I let my grades go, mainly because I was a freshman, but this year I'm working harder," he said.

Achievement in sports

began in high school, when Ludlow was named honorable mention to the Mid-State Activities Association League offensive and defensive teams as a junior.

His senior year, he was named to the first team of the MSAA offense and defense.

He was also honored as an All-Area offensive player on second team.

In wrestling, Ludlow was a three-time MSAA champion in the heavyweight division.

A state qualifier his sophomore year, he placed second his junior and third his senior year as a 4A heavyweight.

In USA Wrestling magazine, Ludlow was also honored his senior year in an article as a wrestler to watch in Kansas.

Scholarships in both sports brought Ludlow to FHSU, where he spent last year as a red-shirt football player, and a varsity wrestler.

His wrestling season resulted in a 3-4 record at heavyweight, with a second place finish at the Kearney State (College) Open and national qualification.

However, a knee injury forced Ludlow to withdraw from competition for six weeks and had negative effects on the remainder of his

season.

This year, he played guard for the Tigers and saw action during kick-off returns.

Transitions between sports is difficult, Ludlow said.

"With most players, football is over and they spend winter lifting weights and waiting for spring practice."

"I have to go straight into wrestling, and I'm completely out of form. It's a lot harder to get into wrestling than football; it's much more technical."

"In football, they tell you who to hit and where to put him, and you go out and do your best. In wrestling, there is specific technique involved," Ludlow said.

Ludlow is involved in daily sports practice from August until March, with off-season conditioning until May.

"I have about four weeks total off from practice during the year," Ludlow said.

Seasonal wrestling goals are now in perspective for the athlete.

"I want to qualify for the national tournament again, and place at it. That's a very high goal at this time in the season," Ludlow said.

"As for immediate goals, I hope to place at the Fort Hays Open this weekend."

FHSU 1-2 after loss to Lady Saints

Lady Tigers lose in final seconds

By Eric Hodson

Assistant sports editor

Last Tuesday, the Fort Hays State Lady Tigers lost a close game on the road against St. Mary of the Plains College.

FHSU was defeated 69-67. In the final 18 seconds of the game, the Lady Tigers had a chance to tie it up or take the lead with a three point shot, but couldn't convert.

"It was just one of those games where if we could have played a couple of more minutes we might have won," Head Coach John Klein said.

The Lady Tigers fell behind in the first half 40-33, shooting 37 percent from the field.

In the second half, FHSU shot 44 percent from the field and outscored the Lady Saints 34-29.

"We hung right in there until the end, but couldn't get the shot in," Klein said.

Leading scorer and rebounder for the Lady Tigers was center Chris Biser with 15 points, seven rebounds and four blocked shots.

The game's leading scorer was Janelle Flax with 25 points. Inside the paint she pulled down nine rebounds.

The battle on the boards was won by the Lady Tigers as they out-rebounded the Lady Saints, 42-37.

Dianne Dugan suffered a knee injury in the contest. Klein said the extent of the injury is still unknown, but that she might be out for two weeks.

Christina Heir, Julie Kizzar and Penny Fischer rounded out the Lady Tigers scoring in double figures, each with 10 points.

The Lady Tigers overall record stands at 1-2 and 1-0 in the conference.

Elway toughest quarterback in NFL today

When you look back at the great quarterbacks who have played the game of football, the names of Unitas, Bradshaw and Staubach come to mind.

When you look at the game today, what field generals fit the category great?

The great quarterback draft of 1983 gave us John Elway, Dan Marino, Jim Kelly and several more.

Before the '83 season, the NFL already had such names as Fouts and Montana.

Which one of these men actually deserves to be called the best quarterback in the NFL?

Since joining the NFL, Kelly has his Buffalo Bills in definite contention for the AFC East title. Just a year ago, the Bills

finished the year with one of the worst records in the league.

Fouts is the old man of the group. In this, his 15th season, Fouts finds himself and the San Diego Chargers atop the AFC West.

Fouts will definitely be in the Hall of Fame someday. He has thrown for over 40,000 yards in his career.

Who can argue with the statistics that Montana has established over the last seven years?

Montana is the highest-rated quarterback in the history of professional football.

The Miami Dolphins picked up Marino with the last pick in the first round. Seven other quarterbacks were chosen ahead of Marino.

One Super Bowl appearance, four Pro Bowls and three MVP awards are just a few of the honors Marino has picked up during his short five-year career.

He also holds NFL records for yardage in a season and touchdown passes.

But, there is a quarterback running around the confines of Mile High Stadium in Denver that has the distinction of being the best.

Never before has one man done as much for a team as Elway has for the Broncos.

"If he is not the MVP of the entire NFL, I don't know who is. He is the best I have ever seen," Broncos Head Coach Dan Reeves said.

When the defensive coordinator of the Chargers was asked what Elway does that scares him the most he replied: "Take the snap!"

THE OZARK MOUNTAIN DAREDEVILS

with BLIND DATE

9 p.m. THURSDAY, DEC. 3 at Judge McGreevy's, 601 Main

GENERAL PUBLIC - \$6

FHSU STUDENTS - \$5

The Ozark Mountain Daredevils are seeing a tremendous surge for their ageless blend of country, rock and blues. They performed in over 50 cities in the U.S. and Canada this summer. They have 11 album releases and over 2 million records sold worldwide. Their classic No. 1 Billboard chart singles include "Jackie Blue" and "If You Wanna Get to Heaven" are consistently played on pop and classic rock radio stations.
