Make Your Home a Haven for Online Safety

October is National Cyber Security Awareness Month! We'll be bringing you cybersecurity tips all month long. This week's topic: Make your Home a Haven for Online Safety.

A protected home network means you and your family can use the internet more safely and securely.

Most households now run networks of devices linked to the internet, including computers, gaming systems, TVs, tablets, smartphones and wearable devices that access wireless networks. To protect your home network and your family, you need to have the right tools in place and confidence that family members can use the internet more safely and securely.

Here are a few tips for making your home a haven for online safety.

- **Learn the basics of computer security** by watching [this short video](#)
- **Keep a clean machine.** Update the security software (antivirus), operating system, and web browser on all of your Internet-connected devices. Keeping your security software up to date will prevent attackers from taking advantage of known vulnerabilities. Visit [STOP THINK CONNECT](#) for more info.
- **Install antivirus software** on your home Windows PC or Mac. Yes, Macs can get malware and viruses too!
 - **Free antivirus:** [PCMag's Best Free Antivirus Protection of 2018](#)
 - **Norton Antivirus and Trend Micro Titanium Antivirus** are available for faculty, staff, and currently enrolled students to purchase in the Software Center. Visit [TigerTech's web page](#) to learn more.
 - **Only install one antivirus program at a time, and set it to install automatic updates.** You do not need to install antivirus on FHSU-owned devices – Tech Services takes care of that for you!
- **Secure your Wi-Fi network.** Your home's wireless router is the primary entrance for cybercriminals to access all of your connected devices. Secure your Wi-Fi network, and your digital devices, by changing the factory-set default password and username.
 - Visit [StaySafeOnline](#) to learn more about securing your home network.
 - [Setup Router](#) has instructions for configuring many brands of routers.
- Please note: TigerTech and Technology Services are unable to provide support for personal devices or software, including support for any of the products or procedures mentioned above. We highly recommend finding a trusted professional to assist you with your home technology needs.

Want to get involved in National Cyber Security Awareness Month?
