Forsyth Library Celebrates National Library Week: April 7-13, 2019

National Library Week is an annual celebration highlighting the valuable role libraries, librarians, and library workers play in transforming lives and strengthening our communities.

Celebrate National Undergraduate Research Week: April 8

Each day, we will be sharing tips for mentoring undergraduate scholars.

1. Set clear and well scaffolded expectations for undergraduate researchers. Develop a tentative schedule for completion of various aspects of the project and discuss the hours your student is expected to maintain.
2. Balance rigorous expectations and emotional support and appropriate personal interest in students. Make an effort to get to know your student on an informal basis. This can facilitate a comfortable working relationship as well as opportunities for discussion future aspirations and options.
3. Build community among groups of undergraduate researchers and mentors, including graduate students, s, and any other members of the research team. A great way to do this is to have regular, weekly meetings with the entire research group.
4. Make yourself available. Dedicate time as well as one-on-one, hands-on mentoring
5. Increase student ownership of the research over time
6. Support students' professional development through networking and explaining norms of the discipline.
7. Create intentional, ladder opportunities for peers and "near peers" to learn mentoring skills and to bring larger numbers of undergraduates into scholarly opportunities.
8. Encourage students to share their findings and provide guidance on how to do so effectively in oral and poster presentations and in writing.

TILT Tip: Knowledge Series – Conceptual Knowledge

Conceptual knowledge is the more complex form of information and contains the interrelationship of factual knowledge. Examples of conceptual knowledge include: principles, models, theories, and laws. Learning conceptual knowledge requires learners to go beyond memorization, in order to understand the relationship and interaction between concepts and terms and making connections between new and prior knowledge. Suitable assessment activities include: asking learners to give examples, classify or compare objects, and explain concepts.
